## Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

## Listing of Claims

1-28. (Canceled)

- 29. (Currently Amended) A method of producing a monoclonal antibody comprising:
  - (a) forming a tetroma cell by fusing a lymphoid cell capable of producing antibody with a trioma cell which does not produce any antibody, wherein the trioma cell is obtained by fusing a heteromyeloma cell which does not produce any antibody with a human lymphoid cell, wherein the heteromyeloma cell is obtained by fusing a human antibody-nonproducing myeloma cell with a mouse antibody-nonproducing myeloma cell; and
  - (b) incubating the tetroma cell formed in step (a) under conditions permissive to the production of antibody by the tetroma cell, thereby producing the monoclonal antibody.
- 30. (Currently Amended) A method of producing a monoclonal antibody specific for an antigen associated with a condition in a subject comprising:
  - (a) forming a tetroma cell by fusing a lymphoid cell capable of producing antibody with a trioma cell which does not produce any antibody, wherein the trioma cell is obtained by fusing a heteromyeloma cell which does not produce any antibody with a human lymphoid cell, wherein the heteromyeloma cell is obtained by fusing a human antibody-nonproducing myeloma cell with a mouse antibody-
